

Reporting

Because the ability to quickly extract your data from an application is as critical as storing it, MIDAS+ Seeker provides you with multiple reporting options.

Extensive Standard Reports are distributed with the system. You can create custom reports with MIDAS+ ReporTrack. Or if you prefer, you can use any third-party SQL-based reporting tool. For comprehensive reappointment profiles, use Indicator Profiles or graphs in conjunction with MIDAS+ Care Management.

Standard Reports Features and Benefits:

- Access Log report for details of user access to functions
- CME Attendance detail report for provider's CME activities
- Committee Attendance reports, as well as a Committee Roster
- Current provider listing with nine different display types
- Provider Expirations Report and Letter, as well as Reappointment report
- Practice Profile summarizes specified practice data
- Worksheets can be printed in full detail or using templates of selected information
- Red Flag Summary provides a detail of identified red flags for a provider
- IQRS Data Verification identifies incomplete records
- Four privilege report options
- GME-focused reports to generate GME Current Provider Listing reports, GME Evaluations reports, and GME Expirations reports
- Automatic population of state-mandated applications

"A doctor just asked for a printout of the medical staff—a chore in the past with a very cumbersome report from Data Processing that I would have to go through for accuracy and it would take a day or more to get.

"Well... not any more. I went into standard reports and printed names and addresses for the medical staff—all categories. Didn't take five minutes. I know that sooner or later I will stop doing back flips over every single accomplishment, but right now this is so cool."

"Since the implementation of MIDAS+ Seeker at Holland Community Hospital, the Medical Staff Office has been able to keep up-to-date information at our fingertips for our physicians and healthcare providers. Information is easily accessible in various formats to meet our constantly changing needs; whether it's for a report, license expiration, a letter to verify education, medical staff roster, etc. Productivity has increased because we are able to accomplish more with the press of a few keys."
