

Midas+ Comply

What is your cost of non-compliance?

Compliance is everyone's responsibility. Engage, achieve and realize continuous compliance and accreditation readiness with Midas+ Comply.

The abundance of regulatory requirements (e.g., CMS, TJC, AORN, ANCC, or state related) requires a dedicated, committed and organizational response to ensure compliance. Reduce non-compliance costs related to survey findings, outside resources and extraneous time and promote proactive compliance throughout the organization, while eliminating the traditional fear of on-site surveys with Midas+ Comply.

Promote Compliance

The Midas+ Comply solution proactively transforms your compliance and accreditation processes with a central, easily accessible, browser-based, enterprise solution. The unique workgroup methodology promotes active involvement across your entire organization, fosters communication and collaboration, while facilitating a culture-shift towards proactive, continuous compliance.

Produce Results

With the solution's automated integration of completely customizable audits, assessments and action plans, your organization can quickly identify areas of concern as well as best practices, while historically maintaining all related documentation. Conduct Root Cause Analysis (RCA) and Hazard Vulnerability Analysis (HVA) and share real-time compliance and accreditation status through the use of specialized dashboards, reports and automated email notifications.

Provide Value

- Achieve accreditation and compliance
- Promote responsibility and accountability
- Access the most current compliance requirements
- Engage staff, at multiple levels, in the compliance process
- Proactively identify and resolve systemic or other concerns
- Central, historical source for all related compliance activities
- Actionable compliance data focuses future compliance efforts

Accreditation & Compliance

With Midas+ Comply, prove your compliance and be prepared for your next survey today and beyond!

Real-Time Compliance

Midas+ Comply provides dynamic compliance, rather than a static view, through the use of its integrated features:

- Audits
- Assessments
- Corrective Action Plans
- Root Cause Analysis (RCA) & Hazard Vulnerability Analysis (HVA)
- Enterprise & Reporting Capabilities

Audits

Continual monitoring of compliance is essential in achieving and maintaining accreditation readiness. Midas+ Comply provides a variety of features to successfully facilitate that continual process such as:

- More than 100 provided audit templates for immediate use or customize as needed to meet your specific objectives
- Step-by-step wizards simplify audit template creation, audit assignments and audit reporting
- Easily identify areas of concern as well as best practices
- Automatic generation of related Corrective Action Plans for each area of non-compliance
- Flexible audit response options, other than generic “Yes/No”, permit numerical data entry and reporting
- Subscription feature automatically assigns selected audits to desired personnel in multiple locations at your customized time intervals
- Ensure audit completion with automated email notifications and scheduled alerts
- Create real-time summary and detailed reports using provided report options and fully customizable, interactive charting, allowing each user to view and share applicable information
- Generate and share all created audit reports in one, central location, eliminating the need to manually send such information

Assessments

Regardless of accreditation organization, periodic assessments allow organizations to validate compliance status. The solution’s unique and customizable workgroup methodology promotes a realistic, sharable view of compliance and also serves as a potential educational opportunity for applicable staff members. Features include:

- Automatic delivery of updated requirements from the various accrediting organizations, eliminating the need to manually compare versions
- Ability to view all current and historical assessment information including past survey findings, comments, related documents and applicable Corrective Action Plans
- Real-time Audit integration with related requirements validates compliance status for all assessment members
- View all progress, on-demand, at multiple levels of reporting

Corrective Action Plans

While identifying areas of concern is critical to ensure accreditation readiness, completing the plans to mitigate such areas from initially occurring is vital. The solution’s Corrective Action Plans features include:

- Centrally manage all corrective actions plans with individual priorities, due dates, responsible individuals, and risk reduction strategies
- Reference specific details and include supporting documentation to ensure identification of problem areas, not solely problem symptoms
- Use historical information to identify potential trends in the mitigation process and allow proactive measures to be enacted, as appropriate
- Automated and on-demand email notifications ensure all plans are completed and facilitate communication and knowledge sharing across the organization

Root Cause Analysis (RCA) & Hazard Vulnerability Analysis (HVA)

While the available integration with Midas+ Care Management significantly facilitates the Root Cause Analysis (RCA) process, such integration is not needed to leverage this powerful feature. Specific capabilities include:

- Secured access to events related information
- Step-by-step wizard guides members through the applicable proximate factors and allows for customization of process steps
- Automatic generation of resultant Corrective Action Plans ensures all findings are identified and resolved, as appropriate
- Ability to include progress notes, related documentation and access to all related historical information as well

Additionally, the Hazard Vulnerability Analysis (HVA) provides a centralized source to evaluate all applicable, facility related risk events and includes the following features:

- Customizable HVA categories and related events
- Automatic risk calculation and prioritization for each event based on magnitude and mitigation

Enterprise & Reporting Capabilities

Midas+ Comply is available for a single facility or enterprise organization with multiple locations and compliance needs. Additionally, all included reporting capabilities are both facility specific and/or enterprise related as well.

With a variety of provided report templates, the ability to customize such reports and the exporting capabilities to Microsoft Excel, Midas+ Comply maintains and distributes such information from a central source, saving valuable time and increasing communication and progress across the organization.

The combination of your staff and Midas+ Comply is your pathway to accreditation readiness and continuous compliance!
