

Midas Health Analytics Solutions

Midas Live™ System – Real Time Clinical Surveillance

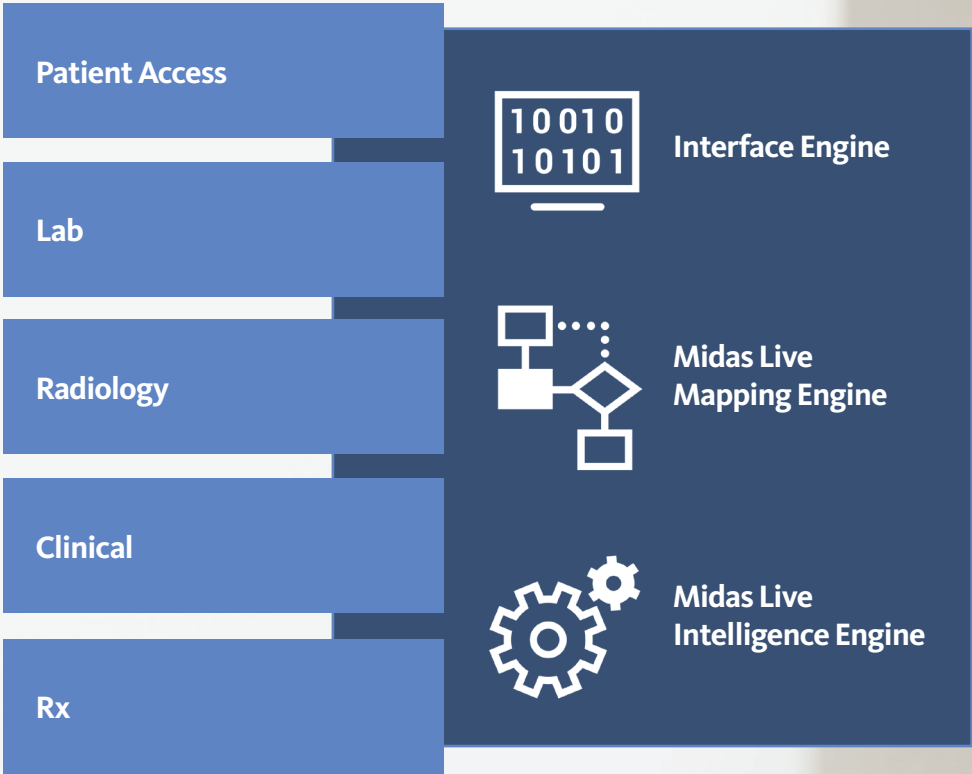

Experience Counts – for almost three decades, Conduent has partnered with client hospitals to meet ever-changing quality reporting requirements.

Midas Live is a web-based, real-time clinical surveillance tool that enables hospitals to meet the Clinical Quality Measure (CQM) reporting requirements of CMS EHR Meaningful Use (MU) Reporting Program, CMS Hospital Inpatient Quality Reporting (HIQR) Program, and The Joint Commission's ORYX® Quality Initiative Program.

Midas Live provides clinicians with an intuitive layout, showing relevant clinical information on multiple patients at a glance to create the needed focus on care. Our solution is designed to meet all of your hospital's quality initiative program reporting and data submission requirements.

Hospital Systems

EHR Meaningful Use Program

Our CQM functions give clients the ability to meet the Meaningful Use criteria to calculate and submit CQM data, while also helping them understand measure rates, identify gaps in data capture and transmission, and track performance at the patient level.

HIQR Program

CMS has mandated hospitals must submit 8 chart-abstracted measures to meet the IQR Program requirement for Calendar Year (CY) 2017/Fiscal Year (FY) 2018. In addition to the chart-abstracted measure requirements, an eligible hospital is required to submit a minimum of any 8 of the available 15 electronic clinical quality measures (eCQMs).

The Joint Commission ORYX Program

Midas Live is an approved ORYX eCQM vendor. For 2017, hospitals have the option to use a vendor for submission of data on 6 of 13 available eCQMs to receive/retain accreditation.

Certified EHR Module

- Meaningful Use Stage 1 and 2 Clinical Quality Measure
- Data Capture and Reporting
- CCHIT certificate CC-2014-115040-1

Features

- Custom worklists
- At-a-glance snapshots of relevant patient information
- Real-time identification of Core Measure and CQM qualified cases to notify providers of action items
- Reports focused on performance improvement

Benefits

- Certified Vendor for Meaningful Use and Inpatient Quality Reporting
 - Largest core measure provider = more experience with IQR reporting
 - Ability to accept electronic flat files for data you are unable to send via traditional HL7 interfaces

About Conduent

Conduent is the world's largest provider of diversified business process services with leading capabilities in transaction processing, automation, analytics and constituent experience. We work with both government and commercial customers in assisting them to deliver quality services to the people they serve.

We manage interactions with patients and the insured for a significant portion of the U.S. healthcare industry. We're the customer interface for large segments of the technology industry. And, we're the operational and processing partner of choice for public transportation systems around the world.

Whether it's digital payments, claims processing, benefit administration, automated tolling, customer care or distributed learning – Conduent manages and modernizes these interactions to create value for both our clients and their constituents.
